

Module-2 (Assignment Day-3)

1. List 5 common issues users face with USB keyboards or mice on laptops, and write one possible solution for each.

No.	Common Issue	Possible Solution
1.	Keyboard or mouse is not working	Unplug it and connect it to another USB port.
2.	USB device keeps disconnecting	Check the USB cable and try a different port.
3.	Mouse cursor is not moving smoothly	Clean the mouse sensor and use it on a proper surface.
4.	Keyboard keys are not responding	Clean the keyboard and reconnect the USB cable firmly.
5.	Laptop does not detect the device	Restart the laptop or update/reinstall the USB device driver.

2. Simulate a troubleshooting flow: Your Bluetooth headphones are not connecting to your phone. Write the exact step-by-step actions you would take to diagnose and fix the issue, mentioning any settings or indicators you would check.

- 1) First, check if the headphones are turned on and have enough battery.
- 2) Open the phone Settings and turn Bluetooth ON.
- 3) Check the headphones for a blinking light, which usually means they are ready to connect.
- 4) If the light is not blinking, press and hold the Bluetooth or power button to enter pairing mode.
- 5) Look at the phone Available Devices list and find the name of the headphones.
- 6) Tap the headphone name and wait for it to show Connected.
- 7) If it does not connect, select the headphones and tap Forget/Unpair.
- 8) Turn Bluetooth off and on again on the phone.
- 9) Restart both the phone and headphones, then try pairing again.
- 10) If the problem still continues, reset the headphones and pair them with the phone again.

3.A user reports that their external webcam is not detected during a Zoom call on Windows 10. Write a checklist of 6 things to check or try to resolve the problem.

Hint Consider device manager, privacy settings, and app permissions.

- 1) **Check the USB:** Make sure the webcam is connected properly.
- 2) **Check Device Manager:** Open it and see if the webcam is listed under **Cameras**.
- 3) **Check camera settings:** Go to Settings -> Privacy -> Camera and turn camera access on.
- 4) **Check Zoom permission:** Make sure Zoom is allowed to use the camera.
- 5) **Check Zoom settings:** Go to Zoom -> Settings -> Video and select your webcam.
- 6) **Restart the PC:** Unplug the webcam, restart the computer, and connect it again.

4. You are helping a friend whose printer is showing 'offline' status on their PC. Describe how you would use the Windows Troubleshooter tool to try to fix the issue, and explain what information the tool provides during the process.

- 1) Open **Settings** on the PC and go to **Devices → Printers & scanners**.
- 2) Select the printer that is showing **Offline**.
- 3) Click **Manage** and choose **Run the troubleshooter**.
- 4) Windows will check the printer connection, driver, and basic printer settings.
- 5) The troubleshooter will show **what problem it found** and give some suggestions to fix it.
- 6) Follow the steps shown by Windows and then try printing a **test page**.
