

Module-2(Assignment Day-1)

1.Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

Category	Types	Real-life use case
Printer	Inkjet Printer	Printing colorful photos and school projects at home.
Printer	Laser Printer	Printing many office documents quickly and clearly.
Printer	3D Printer	Creating a small prototype or model of a product.
Scanner	Flatbed Scanner	Scanning documents, certificates, or photographs.
Scanner	Sheet-fed Scanner	Scanning many pages of office documents quickly.
Webcam	Built-in Webcam	Attending online classes or video calls on a laptop.
Webcam	External USB Webcam	Streaming games or making high-quality video calls.

2. Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage.

Hint: Think about speed, convenience, and compatibility.

Connection Interface	Advantage	Disadvantage
USB	Fast and stable connection	Needs a cable.
WIFI	Its wireless, so cables are not needed.	Requires a Wi-Fi network.
Bluetooth	Easy to connect wirelessly over a short distance	Slower than USB and has a limited range.

4. Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

Device: Printer.

Steps:

1. Turn **on the printer**.
2. Put **paper and ink** in the printer.
3. Take the **USB cable**.
4. Connect one end of the cable to the **printer**.
5. Connect the other end to the **computer's USB port**.
6. The computer will usually **detect the printer automatically**.
7. If needed, install the **printer driver**.
8. Go to **Settings → Printers & scanners**.
9. Check that the printer is shown there.
10. Print a **test page** to make sure it works.
