

ASSIGNMENT DAY-2

1. Draw a labeled diagram of an ATX motherboard and mark at least 8 different slots and ports (such as RAM slots, PCIe slots, SATA ports, USB headers, CPU socket, power connector, etc.).

2. Research and list 3 popular CPU socket types (for example: LGA1151, AM4, LGA1200) and name one compatible CPU model for each.

CPU Socket	Compatible CPU Model
LGA1151	Intel core i7-8700K
AM4	AMD Ryzen 75800X3D
LGA1200	Intel core i7-10700K

LGA1151:

- Compatible CPU model: intel core i7-8700K
- Pins: 1151 land contact on the motherboard
- Support: intel 6th, 7th, 8th, and 9th generation chips

AM4

- Compatible CPU model: AMD Ryzen 75800X3D
- Pins: 1331 pin PGA
- Support: AMD Ryzen 1000 through 5000 series desktop processor

LGA1200

- Compatible CPU model: intel core i7-10700K
- Pins: 1200 land contacts on the motherboard
- Support: intel 10th and 11th generation core processors

3. Explain in your own words the primary functions of the CPU and the chipset on a motherboard, and describe how they work together when you open a music app like Spotify.

- **CPU(Central Processing Unit):** it is the brain of the computer. It execute instruction, performs mathematical calculation, processes logic and coordinates the software operation running on the system.
- **CHIPSET:** The traffic controller of the motherboard. It manages communication between the cpu, memory, storage, graphic card and input/output.
- **How they work together when open Spotify:**
 1. Open spotify application
 2. The CPU receive command and starts the application.
 3. The chipset helps the CPU to access the program files from the SSD/HDD and transfer data through the motherboard.
 4. The CPU loads spotify into RAM and operates the app.
 5. When you play a song, the chipset helps to communicate with the audio hardware and network , while the CPU processes the music playback and user commands.

4. Find a clear photo of a real motherboard (from the internet or your own device), and identify at least 5 different ports or slots by circling them and labeling each one.
